

Archery Scoring Software

Leader Board Scoring

Here is the first leader board scoring module. It allows those in a single competition to be 'Leader Board' scored at each end. A running report can then be printed and displayed showing the current end and the scores of all the competitors. The setup of leader board scoring has been added to the main competition setup screen and allows you to activate it and to select the number of ends in the competition. When the target list is generated an additional file will be built that stores the results for each competitor at each 'end'

Record Will Be Added

Setup Competition Information

Event Date: 

Event Name:

Event Location:

Number of Targets:

Competitors per Target:

If you wish to score each end of arrows then set these options

Leader Board Scoring: **Number of Ends:**

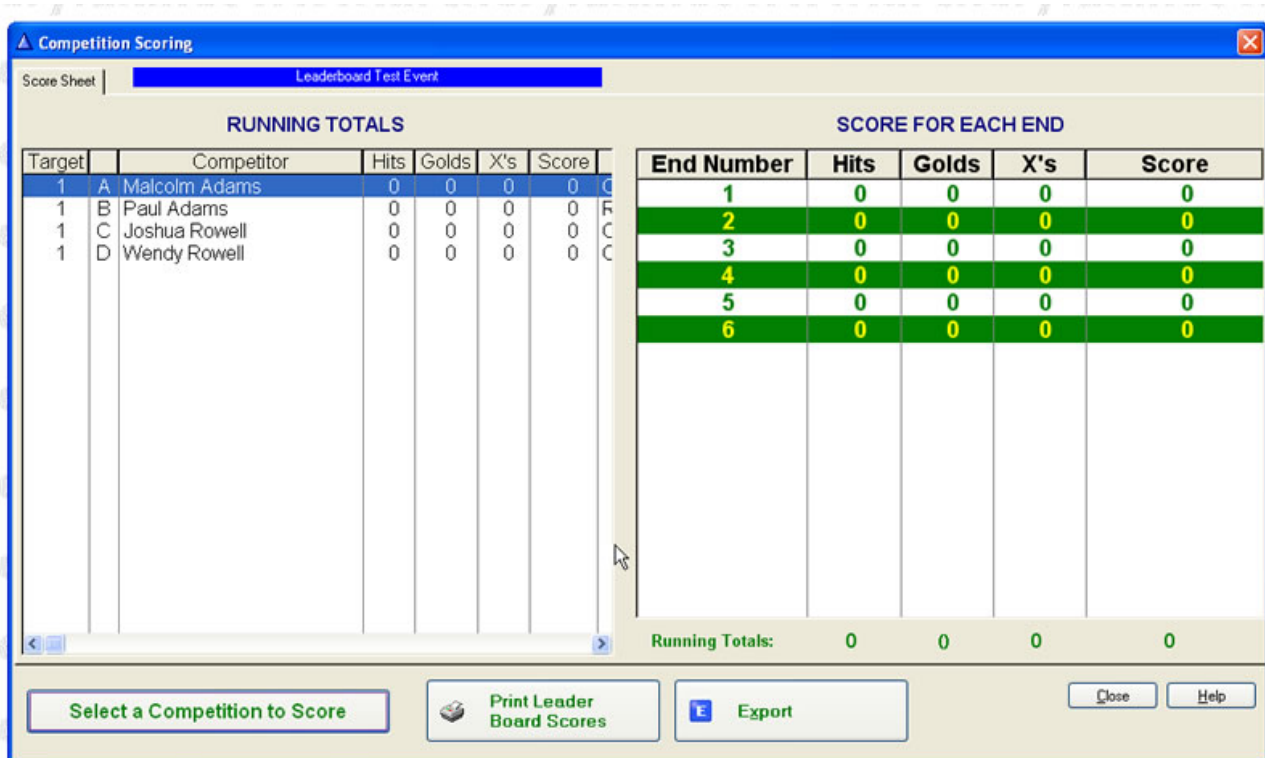

x2 or Double Competition

x 2 Y/N Y N

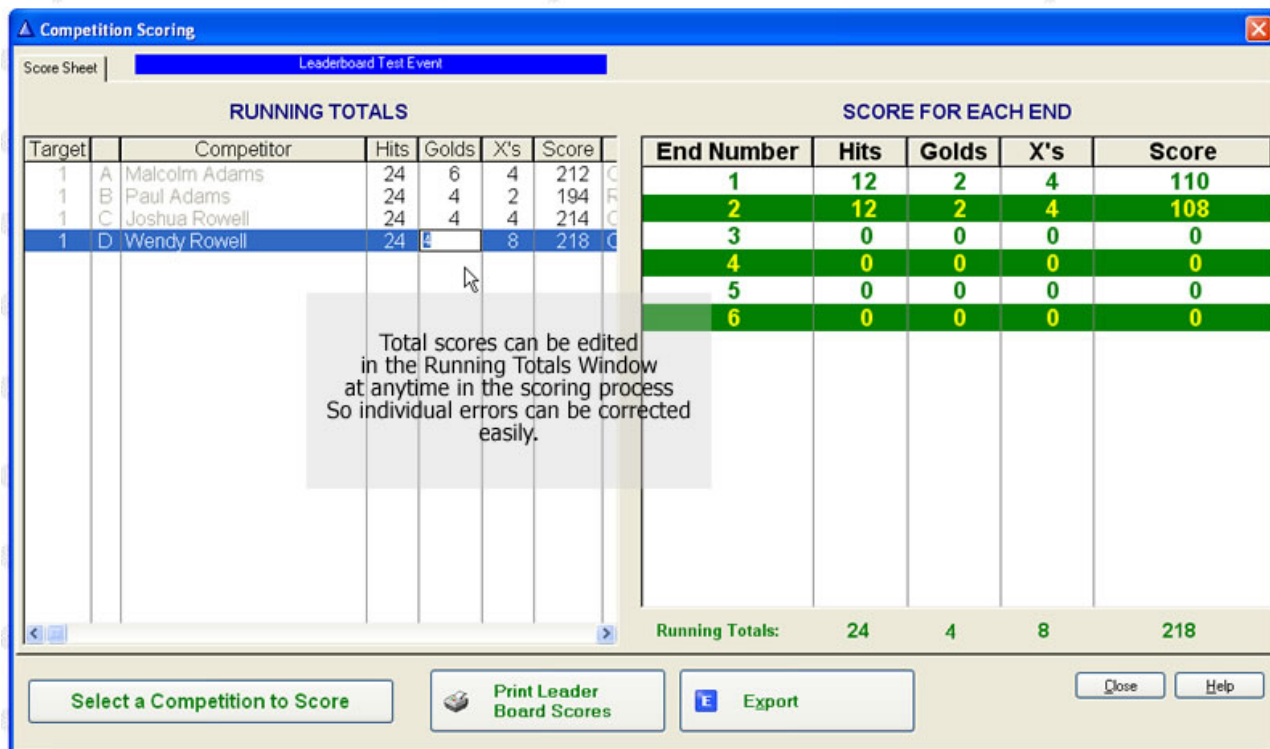

Double Y/N Y N

 **Generate Target Lists**

Here you can see where to select Leader Board Scoring and where to enter the number of ends.

I have setup a single target competition with 4 competitors and 6 ends to demonstrate. Here you can see the scoring screen selected from the 'Score a Leaderboard Event' menu option of the Setup and Manage Events main menu. You must first select a competition using the 'Select a Competition to Score' button. This will display ALL competitions but only those setup with leader board scoring will display the ends to score when selected.

To score an end it is simply a matter of clicking on the Hits column in the place that equates to the end you wish to score in the 'Score for each end' table. It uses edit in place so once you have entered the hits simply hit the tab key to move to the Golds field, then again for X's then again for Score. When you hit it for the last time you will be prompted to save the record. This will update the score

in the left hand box 'Running Totals'. If you make a mistake on scoring you can edit directly in the 'Running Totals' box. I left this in because of a bug that does not automatically update changed entries in the 'Score For Each End' box. This may now be fixed. If you do amend a score in the right hand box and it does not automatically update it in the left hand box then please go into the left hand box and make change manually – see above image.

When you have added the end scores for each competitor then you can click the 'Print Leader Board Scores' button to print out a report to post of the scores so far.
